Network Security Taskmanager

File Edit View Help

Back Logbook Add Computer Online Info

Enter computer name

Configuration

Add a new computer, which will be regularly monitored by the scheduling. Determine the processes for which the Administrator should be warned.

View

You can hide safe processes in the reporting. This improves the overview.

- Hide processes with low risk rating (<20%).
- Hide Windows system processes
- Hide safe reference database processes

Warnings

The Administrator receives a warning, if the risk-rating of a process exceeds: (0% is safe, 100% is dangerous)

Auto-mode

In auto-mode, there is no polling. Incoming alerts are automatically managed.

- Activate auto-mode
 - For incoming alerts, immediately scan the computer concerned
 - Only log incoming alerts

Scheduling

| Computer | Scan | Previous scan |
|-----------|-------------------------------|------------------|
| achill143 | Weekly 11:32 Mo | 08.10.2008 08:43 |
| cvmxp-28 | At the start of a process | 08.10.2008 08:43 |
| hrxcp150 | Once only 20.03.2008 09:00:00 | 25.08.2008 11:02 |
